

ADEWUYI SAMUEL OLUWADAMILARE

Ikorodu, Lagos State.

samueladewuyi11@gmail.com (+234)7086924866)

SUMMARY

Detail-oriented professional with experience in Quality Assurance and Internal Control across the manufacturing and finance sectors. Gaining hands-on experience in process auditing, compliance monitoring, and financial risk assessment. Eager to contribute my growing knowledge and cross-industry experience to a finance environment committed to operational excellence.

EXPERIENCE

Bisiade Nigeria Limited

August 2020– December 2022

Business Manager

- Ensure financial controls, including accurate invoice processing and compliance with regulations.
- Conduct bank reconciliations, GL reviews, and tax compliance verifications.
- Monitor duty segregation and perform store management audits.
- Evaluate physical asset reconciliation processes, streamlining the inventory management system; improve accuracy of asset tracking by 30% and enhance reporting capabilities for financial audits and compliance checks.
- Prepare internal control reports, resolve audit findings, and enforce corrective actions.

Olam Agri – Crown Flour Mills

January 2023 – January 2024

Quality Assurance Analyst (I.T)

- Carried out monthly additive stock reconciliation, ensuring physical stock balances matched SAP records.
- Led a project analyzing product waste (overweight/underweight issues), identified root causes, implemented corrective measures, and reduced material wastage by 10%.
- Conducted thorough fumigation and cleaning procedures for all production lines, ensuring a sanitary environment.
- Conducted thorough monthly inspections of wheat silos, safeguarding against potential risks like infestation.
- Analyzed water treatment chemicals and flour additives, ensuring their quality and effectiveness while preventing contaminations.
- Conducted analysis of the plant's automated gas oil fuel, contributing to effective safety protocols.
- Executed trials in collaboration with the Research and Development teams, analyzing outcomes to refine product quality and ensure consistency while maintaining accurate records of all quality control trials and process parameters for traceability and continuous improvement initiatives.
- Conducted extensive water analysis using a spectrophotometer to ensure pH, iron content, chlorine content, and TDS were within specifications.

- Conducted routine and non-routine analysis on raw materials and finished goods to ensure 100% conformance with quality standards and product specifications.
